Build a Weekly Marketing Metrics Review That Writes Itself in Claude Cowork

[Overview](#) [Instructions](#) [Your Instructor](#)

The Rundown

In this guide, you will learn how to turn a messy weekly marketing review into a repeatable Claude Cowork workflow. Claude will prep the data, verify numbers, draft, publish, and package everything.

Mark as complete

before drafting.

Founders or team leads who need both the detailed marketing review and the short leadership version from the same source-backed workflow.

What You Will Build

You will build a small reporting workspace that Claude can use every week. It will collect the raw inputs, draft the marketing review, create a leadership brief, write the Slack update, capture action items, and prepare polished files for sharing.

Weekly Marketing Review

Week reviewed: 2026-05-18 to 2026-05-24

Narrative focus: Q2 planning readiness and pipeline quality.

Executive Summary

Marketing created \$2.31M in pipeline this week, up from \$1.84M the prior week. The improvement was supported by higher demo requests, more SQLs, and more opportunities while paid spend decreased. The cleanest story for leadership is not just more volume. It is better readiness for Q2 planning, especially in Mid-Market, with a reporting cleanup needed between campaign groups and sales segments.

Verified Metrics

Metric	Prior week	Current week	Readout	Source
Website sessions	84,200	87,950	Demand volume improved	source-verification
Demo requests	1,190	1,285	High-intent demand improved	source-verification
MQLs	1,110	1,235	Qualification volume improved	source-verification
SQLs	396	438	Sales acceptance improved	source-verification
Opportunities	112	128	Pipeline quality improved	source-verification
Pipeline created	\$1.84M	\$2.31M	Main weekly gain	source-verification
Paid spend	\$196,000	\$188,500	Spend decreased	source-verification
Blended CAC estimate	\$6,200	\$5,900	Efficiency improved, pending finance close	source-verification

1. Pipeline quality improved, with pipeline created rising to \$2.31M.

Pipeline created increased from \$1.84M to \$2.31M. The supporting indicators moved in the same direction: SQLs increased from 396 to 438, opportunities increased from 112 to 128, and demo requests increased from 1,190 to 1,285.

Meeting notes for all recent marketing meetings

Going Further

Once this works once, make the workflow improve itself.

After each marketing update, ask Claude:

PROMPT

 Copy

```
What changed in this review, what did you get wrong, and what should become a durable instruction for next week?
```

Then approve a small update to the reporting skill. That is how the workflow gets better over time without turning into a messy one-off chat.

You can also add a weekly prep automation. Have Claude run the input skill before your review meeting, then leave the final writing and publishing steps gated behind your approval.

That is the bigger idea here: do not just ask Claude to write a report. Give it a place to work, a repeatable process, and a review loop that makes the next report easier.
