GUIDE

Build an AI Secretary That Finds Open Action Items and Plans Your Day (Works With Slack + Gmail + Calendar)

[Overview](#) [Instructions](#) [Your Instructor](#)

The Rundown

In this guide, you will learn how to use Codex or Claude Code to build an AI taskmaster that checks Slack, Gmail, and your calendar every morning. It turns the mess into a prioritized to-do list that gets better every day you use it.

Mark as complete

Founders and team leads who want a morning list without maintaining another to-do app by hand.

AI power users who want their agent to learn from feedback instead of repeating the same bad suggestions every day.

What You Will Build

You will build a simple one-skill, one-automation task tracking system that works with any coding agent. It automatically updates your to-do list each day in a single Markdown file, then improves based on your feedback in a task-rules.md guidance file.

Thursday, May 21, 2026

High Priority

What You Need

- Follow up with Jordan from a SaaS vendor about pricing options and decide the next step.
Source: [Gmail](#) | [Calendar](#)
Status: ☒ done ☐ bump ☐ cancelled
- Codex or Claude Code.
Training: ☒ High priority ☐ Medium priority ☐ Low priority ☐ Not relevant ☐ cancelled
- Connected to a calendar.
- A Markdown note app like Obsidian or Cursor.
Finish today's University production block: 2 guides, 3 guide outlines, and 1 YouTube video.

Status: ☐ done ☐ bump ☒ cancelled
- Automation or scheduled task support.
Training: ☒ High priority ☐ Medium priority ☐ Low priority ☐ Not relevant ☐ cancelled

Going Further

- Upload and schedule the May 25-29 YouTube videos today. Source: [Notion](#)
Status: ☐ done ☒ bump ☐ cancelled
Training: ☒ High priority ☐ Medium priority ☐ Low priority ☐ Not relevant ☐ cancelled
- Create a weekly audit skill that scans your task list.
• Reconnect workspace permissions for the guide research assistant so the daily research workflow keeps running. Source: [Notion](#) | [Gmail](#)
- Find repeated tasks that keep showing up.
Status: ☐ done ☒ bump ☐ cancelled
- Turn repeated tasks into candidates for future AI automation.
Training: ☐ High priority ☐ Medium priority ☒ Low priority ☐ Not relevant ☐ cancelled
- Use the same loop for other workflows: create a skill, run it once, automate it, then improve it with feedback.

Medium Priority

- Review the Daily AI Research Report for May 21 and choose any guide-worthy items to promote. Source: [Notion](#)
Status: ☐ done ☐ bump ☒ cancelled
Training: ☐ High priority ☐ Medium priority ☒ Low priority ☐ Not relevant ☐ cancelled

to clean up every morning.
